

An Ottawa Forum on Ontario's Energy Future

Odawa Centre, 12 Stirling Ave; Ottawa ON
Friday September 28, 2007
4:30 pm – 9:30 pm (doors open at 4:00 pm)

Ontario's electricity system is at a crossroads. Our existing power plants are aging. The Province is about to commit to billions of dollars in new infrastructure that will determine how we live for decades to come, but the public has not been consulted. The plan the Province has put forward does not meet Ontario's share of the Kyoto requirements and will not be subject to an Environmental Assessment. It focuses on more investment in nuclear power which has already left us a legacy of debt and radioactive contamination. Investments in conservation and renewable energy remain low. We deserve a say in our future.

\$10 Donation or what you can afford...refreshments and food provided.
Come to express opinions, share knowledge and discuss strategies to create a positive energy vision for Ontario. An Energy survey will be available to fill out.

Register online at: www.voteformcleanenergy.ca/power_to_choose
Deadline for registration is Tuesday, September 25, 2007
